Participant	Background/previous experience	Task 1 Notes	Task 1 Success	Task 1 rating	Task 2 Notes	Task 2 Success	Task 2 rating	Task 3 Notes	Task 3 Success	Task 3 rating	Debrief
p01	3 years. clear layout, being able to interact everything/ FL studio, garage band. vacuum track, ambient, synthisizers	login, tools, creates clip, save file, create project, sound clip, goes to file	success	4 Easy	Special Effects, believes they are already effecting clips, saves, modifies, exits by accident. unclear if it already modifying clip. Unsure if they were successful	success	4 Easy	song creator, adds other clips, purple soundwave, stretches sound clip.	success	5 Very Easy	Pretty confident but unsure about task 2. task 2, not sure what it's effecting, lack of clarity. task 1, finds piano roll perfectly. pretty similar, not cluttered. special effect, visual cues as to what's being affected
p02	ocassionaly logic pro, something easy to use, logic pro, ableton, FL Studio. trying to create beats.	beings by logging in, creates project, goes to file, creates sound clip, save file. missed file button but blames themselves for not seeing it.	success	5 Very Easy	goes to special effect. changes special effects, saves special effects	success	5 Very Easy	goes to song creation tool, applies all sound clips, extends all sound clips, saves song.	success	4 Easy	Felt they were able to complete the task. didn't find anything necessarily difficult, hard to figure out how to. sound clip, but still relatively easy. can create things in piano roll, save and change clips. song creator, make more visual, more visual feedback. no final thoughts.
p03	no experience	struggled to get to sound clip, was unsure how to get to music creation spot, struggled to find save button, after a lot of searching, found save button	success	2 Difficult	created clip, saved clip, loaded clip, modified clip, saved clip, still struggled	success	3 Medium		success	4 Easy	yes, however, not sure if tasks were completed correctly. Not confident. First task was most difficult, unable to find save button, looking for tool bar, didn't think to look for file button. last task was the easiest, still not confident. N/A. implement tool.
p04	6 years experience w/ digital daws looking for good UI, something easy to use, and want the freedom to change what theyre doing Have used LMMS, and FL Studio Not looking to produce music but instead make music and beats.	able to login, create project, goes to tools, tries to expand notes but cannot, creates a clip, cannot find save button.	fail	2 Difficult	goes to special effect. loads in a file. changes beat. changes special effects, cannot apply nob at intervals, saves special effects	success	5 Very Easy	goes to sound creator. opens all sound waves. Changes them. Saves it.	success	5 Very Easy	confident about ability to complete all tasks besides saving. First task, because he could not find the save button. Third task, straight forward process. Needs better readability for features. Readability Throughout design, better call to action, not drawn to buttons.
p05	Two years easy to use for a beginner garage band/ others music for video games and develop beats	Go to sound clip creates a sound clip goes to file saves	success	5 Very Easy	Goes to special effects loads sound clips cannot cannot sound clips stays at either zero or 100 saves	success	3 Medium	Goes to song creator apply sound clips extend sound clips saves	success	4 Easy	Minor difficulties, but was able to complete tasks. Task two was the hardest because of order of operation. Task one was the easiest because it was most natural order of progression. Easier to use than GarageBand. labeling which page you are on to indicate where you are at
